

Deployment of new Scriptum.EAR file.

1. Download the new binary EAR file `Scriptum.ear` from <http://projects.ellak.gr/projects/scriptum/files>
2. Place `Scriptum.ear` in your SCRIPTUM hosting server's directory, for example `/home/scriptum`

3. **While JBOSS is started** do the following file move:

```
# mv $JBOSS_HOME/server/default/deploy/Scriptum.ear  
$JBOSS_HOME/server/default/deploy/Scriptum.ear.old
```

4. Copy the file in the JBOSS server's deployment directory:

```
cp /home/antiproedros/Scriptum.ear  
$JBOSS_HOME/server/default/deploy/
```

5. Test if Scriptum is available via HTTP from your browser.

6. In case of a problem, view the server's logs at:

```
$JBOSS_HOME/server/default/log/server.log
```

7. If operation failed, restore your old ear:

```
# mv $JBOSS_HOME/server/default/deploy/Scriptum.ear.old  
$JBOSS_HOME/server/default/deploy/Scriptum.ear
```
